EXECUTIVE SUMMARY

Senior Flutter Developer & Mobile Architect with 4+ years of experience engineering production mobile applications. Specialized in **Clean Architecture**, **BLoC state management**, **Impeller engine motion optimization**, and **offline-first database synchronization**. Published applications globally on **Google Play Store**, **Apple App Store**, **CafeBazaar**, and **Myket** with 1,500+ active users. Author of 14+ public GitHub repositories demonstrating modular package architecture and clean code.

TECHNICAL CORE COMPETENCIES

Languages & Runtimes:	Dart 3.x (Null-Safety, Records, Patterns, Extension Types), HTML5, CSS3, ES6+ JavaScript
Framework & Engine:	Flutter SDK (3.x), Impeller Engine, Material 3, Cupertino, CustomPainters, Multi-Ticker Animation Controllers
Architecture & Design:	Clean Architecture, Feature-First Modularization, BLoC/Cubit, MVVM, SOLID, Dependency Injection (get_it, injectable)
Backend & Cloud:	Firebase Ecosystem (Auth, Firestore, FCM, Cloud Storage, Crashlytics), REST APIs (Dio), WebSockets
Database & Offline Sync:	Hive DB, Isar DB, SQLite (sqflite), Drift, Flutter Secure Storage, SharedPreferences
App Stores & DevOps:	Google Play Console, Apple App Store Connect, Git, GitHub Actions (CI/CD Pipelines), Unit & Widget Testing

PROFESSIONAL EXPERIENCE

Senior Flutter Developer & Product Engineer — Commercial Apps & App Stores 2023 – PRESENT

- Architected, developed, and published production Flutter applications (**WeekiLaw** on Google Play & App Store, **FrameSanj**, **Mobin**, **VazheJoo**) reaching 1,500+ active users.
- Enforced modular Feature-First Clean Architecture strictly isolating Domain entities, Use Cases, Repository implementations, and BLoC ViewModels.
- Engineered offline-first local database sync engines using **Hive & Isar DB** guaranteeing zero-latency launch and smooth performance.
- Optimized rendering trees to maintain a stable **60 FPS** rate across low-end and flagship devices.
- Automated build pipelines using GitHub Actions CI/CD for static analysis ('flutter analyze'), unit testing, and release app bundle generation.

Flutter & Mobile Application Specialist — Mobile Software Solutions 2020 – 2023

- Engineered cross-platform apps integrated with real-time Firebase backends (Authentication, Firestore live streams, FCM push notifications).
- Developed complex UI/UX modules including real-time social feeds (**Instagram Clone**) and e-commerce shopping workflows (**Nike Store**).
- Built HTTP network infrastructure using **Dio** featuring custom auth token refresh interceptors and centralized exception handling.

DETAILED PROJECTS SHOWCASE & PUBLISHED APPS

🏛️ WeekiLaw (ویکیلا) — AI Legal Assistant & Smart Lawyer Office Platform Google Play & App Store & Bazaar

Technical Details: Published cross-platform legal services platform on **Google Play Store** and **Apple App Store**, as well as **CafeBazaar** & **Myket**. Features AI legal Q&A assistant, lawyer smart office dashboard, and online appointment booking.

Google Play

App Store

Flutter

AI API Integration

REST API (Dio)

Firebase

BLoC

Clean Arch

🎮 FrameSanj (فریمسنج) — PC Game Compatibility & FPS Estimator App CafeBazaar & Myket

Technical Details: Offline PC hardware analyzer & FPS estimator app that compares system specs (CPU, GPU, RAM) against minimum and recommended game requirements for 100+ titles.

Flutter Dart Offline DB Clean Architecture BLoC Hardware Matching Algorithm

 **Mobin (مبین)** — [Spiritual Companion App \(1,500+ Active Installs\)](#) CafeBazaar Published

Technical Details: Spiritual companion app featuring real-time high-precision Qibla compass using device magnetometer & accelerometer sensors, prayer time calculation algorithms, and digital Dhikr counter. Reached 1,500+ active installs.

Flutter Sensors & GPS Offline Sync Location Services

 **VazheJoo (واژه جو)** — [Persian Offline Word Finder](#) CafeBazaar & Myket

Technical Details: Fast offline Persian word discovery application powered by custom word-generation algorithms and fast indexing to find hidden words from letter combinations without network connection.

Flutter Persian NLP Algorithms Hive Storage

EDUCATION & FOCUS

Software & Computer Engineering Studies

Focus: Software Architecture, Clean Code Principles, Mobile Systems, Data Structures & Algorithms.
