

EXECUTIVE SUMMARY

Senior Mobile Application Engineer with 4+ years of production experience architecting, delivering, and scaling mission-critical cross-platform mobile systems. Deep expertise in **Clean Architecture (Domain/Data/Presentation)**, **BLoC & Reactive State Management**, **Flutter Impeller 120 FPS native graphics optimization**, and **offline-first database sync engines**. Engineered and deployed commercial mobile applications across **Google Play Store**, **Apple App Store**, **CafeBazaar**, and **Myket**, reaching 1,500+ active users. Author of 14+ open-source repositories maintaining high test coverage, strict SOLID principles, and zero-leak lifecycle management.

TECHNICAL CORE COMPETENCIES

Languages & Runtimes:	Dart 3.x (Null-Safety, Records, Patterns, Extension Types, Isolates), HTML5, CSS3, ES6+ JavaScript
Framework & Engine:	Flutter SDK (3.x) , Impeller Rendering Engine, Material 3, Cupertino, CustomPainters, Multi-Ticker Animation Controllers
Architecture & Patterns:	Clean Architecture , Feature-First Modularization, BLoC/Cubit, MVVM, SOLID, Dependency Injection (get_it, injectable), Repository Pattern
Backend & Cloud:	Firebase Ecosystem (Auth, Firestore, Cloud Messaging/FCM, Cloud Storage, Crashlytics), REST APIs (Dio), WebSockets, GraphQL
Database & Offline Sync:	Hive DB , Isar DB , SQLite (sqflite), Drift, Flutter Secure Storage, SharedPreferences (Offline-First Sync)
App Stores & DevOps:	Google Play Console , Apple App Store Connect , Git, GitHub Actions (CI/CD Pipelines), Unit & Widget Testing (flutter_test)

PROFESSIONAL EXPERIENCE

Senior Mobile Application Engineer — Commercial Products & App Stores 2023 – PRESENT

- Architected and launched flagship production mobile applications (**WeekiLaw** on Google Play & App Store, **FrameSanj**, **Mobin**, **VazheJoo**), reaching 1,500+ active installations with 4.8★ user ratings.
- Established a scalable Feature-First Clean Architecture strictly isolating Domain business logic (Use Cases, Entities) from Data and UI Presentation layers, reducing bug regressions by over 40%.
- Engineered resilient offline-first caching and local database engines using **Hive & Isar DB**, cutting app cold-boot start time by 35% and guaranteeing zero-latency offline experience.
- Optimized rendering pipelines for the Flutter Impeller engine to guarantee consistent **60/120 FPS** frame rates without frame drops (Jank) via scoped `BlocBuilder` rebuilds and `const` constructor enforcement.
- Implemented automated CI/CD deployment pipelines using GitHub Actions for static analysis (flutter_analyze), unit test suites, and automated release builds (AAB for Google Play, IPA for App Store).

Mobile Software Engineer — Software Solutions 2020 – 2023

- Developed full-stack cross-platform mobile apps integrated with real-time Firebase services (Authentication, Firestore live streams, FCM push notifications).
- Built high-fidelity interactive UI modules including real-time social feeds with instant messaging (**Instagram Clone**) and e-commerce cart/checkout workflows (**Nike Store**).
- Engineered a centralized HTTP networking layer with **Dio** featuring JWT token auto-refresh interceptors, retry policies, and structured exception handling.
- Ensured pixel-perfect implementation of Figma design tokens, responsive layouts across 375px to tablet viewports, and native gesture animations.

DETAILED PROJECTS SHOWCASE & PUBLISHED APPS

WeekiLaw (ویکیلا) — AI Legal Assistant & Smart Lawyer Office Platform Google Play & App Store & Bazaar

Technical Details: Published cross-platform legal services application on **Google Play Store** and **Apple App Store**, as well as **CafeBazaar** & **Myket**. Features an AI-powered legal consultation assistant, smart office management dashboard for attorneys, and real-time online appointment scheduling.

[Google Play](#) [App Store](#) [Flutter](#) [AI API Integration](#) [REST API \(Dio\)](#) [Firebase](#) [BLoC](#) [Clean Arch](#)

FrameSanj (فریمسنج) — PC Game Compatibility & FPS Estimator App CafeBazaar & Myket

Technical Details: Offline PC hardware analyzer & FPS estimator app that compares user system specs (CPU, GPU, RAM) against minimum and recommended requirements for 100+ titles, estimating expected FPS and graphic presets via custom offline matching algorithms.

Flutter Dart Offline DB Clean Architecture BLoC Hardware Matching Algorithm

 **Mobin (مبین)** — Spiritual Companion App (1,500+ Active Installs) CafeBazaar Published

Technical Details: Spiritual lifestyle app featuring real-time high-precision Qibla compass using device magnetometer & accelerometer sensors, offline prayer time calculation algorithms, and digital Dhikr counter. Reached 1,500+ active installs.

Flutter Sensors & GPS Offline Sync Location Services Local Notifications

 **VazheJoo (واژه جو)** — Persian Offline Word Finder CafeBazaar & Myket

Technical Details: Fast offline Persian word discovery application powered by custom word-generation algorithms and fast indexing to find hidden words from letter combinations without network connection.

Flutter Persian NLP Algorithms Hive Storage

EDUCATION & FOCUS

Software & Computer Engineering Studies

Focus: Software Architecture, Clean Code Principles, Mobile Systems, Data Structures & Algorithms.
